Technical Narrative

I help teams ship faster and safer by building smart, secure & scalable DevOps solutions that deliver stability and speed. I bridge the gap between development and operations to create systems that are efficient, resilient, and built to grow. I believe effective DevOps goes beyond tools and pipelines—it is about building a culture of collaboration, accountability, and continuous delivery that supports long-term engineering excellence.

Technical Tool-Kit

- Hands on Experience on Multi-Cloud Providers (AWS, Azure, GCP, Oracle Cloud, Contabo, Hostinger, Railway & On-Prem Deployments)
- Secure & Standardized Automation Workflows (GitHub Actions, GitLab CI/CD, Jenkins, Azure Pipelines, Bit bucket CICD, Custom Watchers for On-prem Machines)
- Monitoring, Logging & Application Insights (Grafana, Prometheus, Promtail, Loki, Node-Exporter, Alert-manager, DataDog, Elastic search/Log stash/Kibana Stack, BullMQ for Redis Insights)
- Secure Design and Implementation of Microservices Containerization and Orchestration Using Industry Standards (Docker, Docker Swarm, Kubernetes, Windows, Linux, MacOS Builds for Desktop Apps)
- Security, Compliance & Audit (SOC-2, IS0-27001 Licensing, SonarQube, Sentry, Burp, Code Rabbit, Sprinto, OWSAP, DAST, SAST, Trivy, Docker Scout, GitLeaks, Depandabot, NightWolf, Penetration Testing, CentralCSP)
- IaC State Management & Configuration Management (Terraform, Pulumni Cloud, CrossPlane, Control Tower)
- Key Vaults & Secrets Management (AWS Secret Manager, Azure Vault, Git Hosting Providers Vaults, HarshiCop, BitWarden)
- Disaster Recovery & Backup Solutions (Auto Image Capturing of Machines, DB Dump Mechanisms, Version based Application Images, S3 Versioning, Multi Region Resource Replication)
- Enforced Policies on Codebases for a better SDLC Lifecycle. AI powered Code Reviews, Inspection of PR's and custom GitHub Code spaces for Developers Ease.
- Custom Solutions for Isolated Environments following Clients SOP's & Polices.
- Cloud Resources Cost Anomaly Detection & Optimization of Inventory (Custom Dashboards, Improved Forecasting)
- Custom Tools Integration inside Communication Channels to keep the track of progress being made & DevOps Enforced Policies to streamline the SDLC Process.
- Team Leadership & Collaboration, strategic resource alignment, and milestone planning based on business priorities
- Others (Prior Experience in Custom Software Solutions / Development, Project Management, B2B Services & Client Handling)

resume

Technical Experience - Industry

DevOps Engineer — Axiom World / Intellilake | *Feb/2026 – Present*

- Serving as a Senior DevOps Engineer at Axiom World, providing cloud infrastructure and DevOps solutions to Intellilake, a product-based Fintech client.
- Day-to-Day Work includes operating in a highly-secure environment supporting enterprise-grade clients with associations across financial institutions such as Millennium, KKR & JP Morgan's.
- Responsible for managing the SDLC, securing cloud infrastructure on AWS with a strong focus on compliance.
- Leading the Internal Team on day-to-day Support tasks on Odoo & Custom ERP Solutions.

DevSecOps Engineer — Onex Studio | *Jan/2025 – 2026*

- Onex is an enterprise-grade AI observability and governance platform focused on model monitoring, safety, compliance, and FinOps for large-scale AI systems.
- Contributed to the platform's SOC 2 and ISO 27001 compliance efforts, helping strengthen its security posture and governance practices. With major clients such as FPT, security, compliance, and operational reliability were critical to the platform's success.
- Being part of ONEX's journey from its initial product concept to a growing enterprise-grade platform has been a significant milestone in my career. This experience has provided valuable exposure to product evolution, infrastructure stability, security engineering, and the technical challenges of building and maintaining enterprise-ready AI systems.

DevOps Engineer — Ideatolife | *Feb/2024 – 2026*

- Delivered DevOps and cloud infrastructure solutions for a Dubai-based technology services organization serving clients across the MENA region, including PwC, Kulud, and DISC.
- Managed cloud infrastructure provisioning, automation, and resource optimization to ensure operational efficiency and reliability.
- Designed and maintained the Infrastructure for multiple client projects across production, staging, and UAT environments.
- Collaborated with engineering teams to address infrastructure challenges & optimized resource utilization.

Software Engineer — Syntax Digital | *Jun/2022 – 2023*

- Contributed to the development of web applications using Laravel & Node Stack, focused on performance, maintainability, and user experience.
- Implemented secure authentication and authorization mechanisms using JWT, OAuth, and Firebase-based identity solutions.
- Worked with Typescript-based codebases, enhancing code reliability, maintainability, and reducing production-level runtime issues

PERSONAL CERTIFICATIONS

- AWS Cloud Practitioner
- AWS Partner: Technical Accredited
- “Be Smart, Be Secure” by PwC
- AWS Educate Cloud 101
- MERN Stack (Knowledge Streams)

EDUCATION

Bachelor's in Information Technology
University of Education, Township, Lahore | 2024.
